Technilamp's heaters

Technilamp, South Africa's leading supplier of infra-red heaters has launched a new range of lifestyle heaters for the home and restaurant markets.

'These unique and ultra modern designed heaters operate like the sun by warming people and not the environment,' says Hylton Cowie, commercial director of Technilamp. 'They are designed to deliver warm, comfortable heating that is pleasing to the eye and cost-effective. Infra-red heaters generate savings in the region of 90-95% when compared to gas heaters,' adds Cowie.

The infra-red heater covers an area of approximately 28 square meters and have many features including: carbon fibre tubing, an energy saving lamp, magnetic remote control, roll up cord, wheels on the base for the ease of portability and an automatic liquid switch off system.

For large open areas like home patios, restaurants, pavement coffee bars and small offices, these environmentally-friendly heaters are ideal for effective indoor and outdoor heating. The Technilamp heaters are available in a select number of lifestyle stores around South Africa. The recommended retail price is in the region of R6 999 to R 7 999.

Ideal winter bedding

Lifson Products has launched two bedding products ideal for the hospitality industry.

Fine Fibre

Fine Fibre was developed in response to calls from the hospitality industry for a down alternative which was suitable for allergy sufferers and high traffic use and like down provides warmth without weight.

Fine Fibre products are made from innovative microfibre filling developed and imported from Europe. To date this is the only filling of its kind that has been proven to be machine washable and tumble dryable, making Fine Fibre products ideal for domestic and hospitality use. Both the duvets and pillows are mite-free and anti-allergenic.

Micromax

Micromax duvets are filled with siliconised hollowfibre balls and encased in a microfibre fabric which is indulgently smooth against the skin. Duvets are quilted to ensure the filling does not shift during the night or after washing. Soft to the touch, the duvets and pillows mould to the shape of your body and offer great comfort.

Microfibre duvets and pillows are both hypoallergenic and machine washable.

Lifson Products are giving away 2 queen-sized Fine Fibre duvets valued at R1 000 each to two lucky *Hospitality* readers. To stand a chance to receive this fabulous gift, send an e-mail with your details and why you would like to receive it to hospitality@picasso.co.za.
